

Use Case: Requirement Analysis

Use AI to *Converting ambiguous requirements into precise test scenarios and RTT*

Context:

Your team is given a sample BRD & ERD of **SmartBank Digital Banking System** .

Your Task (as Prompt Engineers):

Create a powerful, structured prompt that guides the AI assistant to perform the following:

- Analyze the raw BRD & ERD document
- Identify the ambiguous requirements
- Suggest Test Scenarios
- Generate Requirements Traceability Matrix

Objective:

Time Limit: 15 minutes

Evaluation Criteria:

- Clarity and completeness of the prompt
- Use of structured format and roles
- Application of prompting techniques like few-shot, chain of thought, or role prompting
- Quality of expected AI response (secure, accurate, and usable)
